<b>Description of Blue Star Item</b>	The construction of the new Merafield Road Bridge spanning the A38 dual carriageway involves the re-alignment of Merafield Road. The site team have looked at how plant and pedestrians interface on the site and have looked at a number of areas where this can either be eliminated or managed more effectively. With some activities the proximity of plant to pedestrians cannot be eliminated and the use of forward tipping dumpers on the site was investigated. With the help of Interserve Site Services the site team have hired in a Neuson 9t swivel tip dumper with a forward looking camera fitted below the tipping skip to provide the driver with a clear view of what is in front of the dumper. This dumper is also fitted with a green light which identifies when the driver has his seat belt on.
<b>Benefits of Blue Star Item</b>	Reduces the risk of personnel being struck by plant.
<b>Details and Cost of any Specific Product</b>	Interserve Site Services – 9T swivel tip dumper @ £215/week.
