Description of Blue Star Item	Matting placed over re-bar to allow safer access and working area for steel fixers, carpenters and others working on re-bar structures. The matting is light weight and easily moveable to allow for changes in work locations.
Benefits of Blue Star Item	<p>The matting is anti-slip and reduces the chances of slip and trip incidents and associated injuries like twisted/sprained ankles or at worse broken ankles.</p> <p>The matting provides a working and walking area that is level and removes the risk of feet getting stuck in the re-bar or people tripping over the rebar. It is light weight and easily moveable – previously scaffold boards or ply wood had been used but this is cumbersome and not as easy to move, ply is also more likely to slip.</p> <p>The matting can easily be cut to adjust to different sizes and locations.</p>
Details and Cost of any Specific Product	<p>Yellowmat.co.uk</p> <p>Each roll comes in a standard 10 metres x 1 metre x 3 millimetres thick. - £145 per roll.</p>
