Description of Blue Star Item	<p>Inductions continue to be delivered in the New Road Compound, in good general compliance with RtB 23 – Site Inductions. The induction is introduced by a member of the Senior Management Team, and there is a test at the end to ensure that the key points have been understood. Since the last inspection, an area has been set up outside the induction room in the compound, to show and explain the various initiatives and standards adopted on site. This includes the use of: Coloured Cones, Goalposts, Safety Stations, Spill Kits, Work Access signage, and Stop Gates.</p> <p>There is also a board showing the various ducts / cables that can be found on site, and those being installed. This gives those being inducted the chance to see the actual items rather than just seeing pictures of them during the induction, and gives them a better appreciation of what to expect on site.</p>
Benefits of Blue Star Item	<ul style="list-style-type: none"> • Improved interaction with personnel during induction • Reinforcement of knowledge gained from induction presentation • Improved appreciation of what personnel should expect out on the project.
Details and Cost of any Specific Product	Minimal cost as barriers / signage already on site. Small cost to make up service board display.
