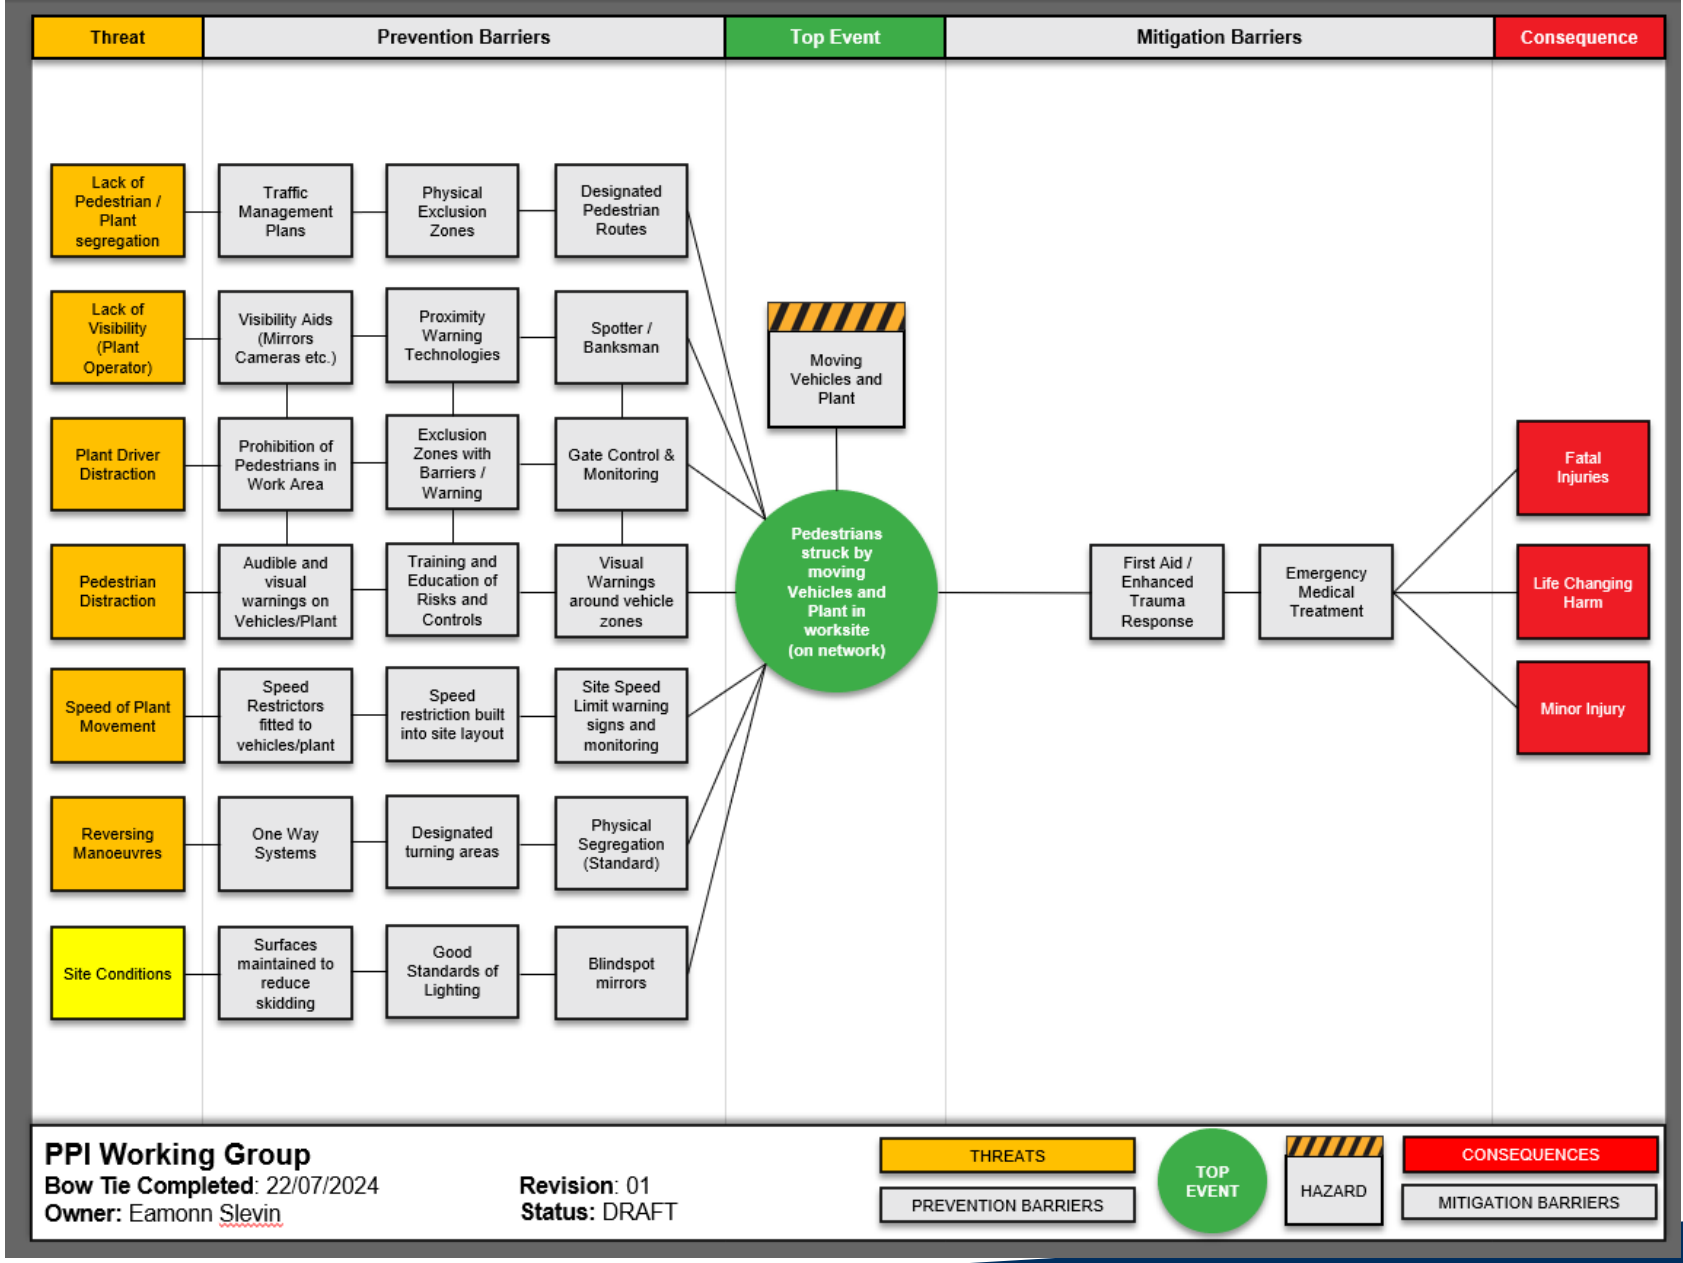
SCSLG Task Group
People Plant Interface (PPI)

August 12th 2024 Update

June 2024

Bow Tie

- Bow Tie workshop held at Flannery's Hub, Sutton Coldfield on the 22nd July 2024
- Linked in with The National Highways Plant Group
- Key Indicator's need to be developed to complete the action



national highways | smp alliance

Non-Technical Skills (NTS) Behavioural Markers

- Survey completed and responses in.
- Responses reviewed and additional information required
  - Specific calls set up for slinger/signallers
- Once complete show and tell on the outcomes for the wider teams

Zonal Control

- Zonal working standard created (incl. human detection / engineering control).
- PPI Siteright course has been socialised with the National Open College Network who own the CSCS card system. Review underway.
- Discussions progressed with National Highways to include in the Safety Passport training.

Human Form Recognition (HFR)

- Following the successful use across NEAR programme, a specification of requirements to be drafted, engaging multiple organisations, this will enable a consistent approach pan-industry
- Link in with the NH Plant Working Group and equipment manufacturers mindful the RTB document is being updated
- Presented to Costain Exec Safety panel for inclusion in our Co standards
- Now significant increase in data being gathered so intention is to collate and decide the best way to share this more widely to influence behaviours – possibly linking in with leading indicators

What's next?

- Leading indicator's distilling to be completed
- Revise common intent
- Bring specific focus to training and wider publishing of Zonal Control with CITB, Site Right etc.
- Define success
