

Blue Star Awards are National Highways opportunity to recognise a company, team or individual who has delivered benefits for Health, Safety or Wellbeing through innovation and shared that knowledge, methodology or product with our sector to improve Health, Safety and Wellbeing for all.

Our new process:

How do I nominate a brilliant idea that's made a real difference to Health, Safety or Wellbeing?

Simply email the case study, photographs and any additional supporting evidence to: BlueStarAwards@nationalhighways.co.uk

How do we score your nomination?

The panel will consider your submission against six criteria.

Context

Why did you bring this solution to your business? Does it link to one of your KPIs or a particular issue or challenge you have?

Innovation

Is your nomination about a product, equipment or a new way of working? Is it something that has never been seen before? Maybe it's a new way of applying an existing method or product? How is it innovative?

Raising the bar

Does your solution apply to one of the Raising the Bar categories?

What you did

Was your approach structured, who was involved in identifying your solution? What did you actually do to deliver the Health, Safety and Wellbeing benefits?

Benefits

What is the extent of the Health, Safety and Wellbeing benefits? Are there other benefits such as CO2e, sustainability, time saved?

Scalability

Can this solution be applied on other projects? How easy is it for others to implement?

These descriptions give you an idea of the sort of information you need to supply, it's not a definitive list!

If we need more information, we'll invite you to come and discuss your submission at the next meeting

Good Luck! We look forward to receiving your nominations!
