Description of Blue Star Item	<p>Banners have been purchased and fixed to bridges and within the works which give the location as once works commence the market posts are removed and the project works to chainages which are confusing to people who are unfamiliar with the system or are new to the project.</p> <p>We have also recently purchased magnetic signs which are matched to the standard colours for services. These are marked with the service i.e. LV as per photograph 3 and further enhanced with the marking out on the surface.</p>
Benefits of Blue Star Item	<p>The benefit of the banners are :</p> <p>New new people to the project can identify if they are in the correct area for their works. In the event of an incident then the location can be pinpointed more accurately than by the use of chainages so should emergency services need to attend these signs are invaluable.</p> <p>Members of the public can use them in the event of breakdown to assist in identifying the area they are in</p> <p>The benefits of the magnetic signs on the varioguard are :</p> <p>Service locations are easily identified rather than just a spray paint marking which can easily be erased due to the traffic or vegetation.</p> <p>There are no spray marks put onto the varioguard which would then require cleaning so there are cost savings</p>
Details and Cost of any Specific Product	<p>The cost of the banner is £18 each and the magnetic squares are £1.20 each</p>
