Description of Blue Star Item	<p>Following some horrendous incidents within the highways industry in 2017 and supporting both the CPA and HE forward tipping dumper redesign, the A19 have been trialling the new JCB HiViz dumper.</p> <p>This is one of several innovative products which are currently (or just about to) enter the market.</p>
Benefits of Blue Star Item	<p>The dumper utilises a structural cab which reduces to an absolute minimum the risk of falls from vehicles as the dumper can be loaded with the driver secured in the cab.</p> <p>In addition, the sloped skip front and lower skip position increases forward visibility and reduces the blind spot to one-meter-high and 1 meter away from the skip.</p> <p>Good decals showing load level and high visibility access and egress points all increase the safety for the driver.</p>
Details and Cost of any Specific Product	<p>Costs for the product are currently high but they should dramatically reduce as existing fleets are phased out.</p> <p>Hire approximately £260 pw Comparison against standard open cab +£80</p>
