

# BBLP CLOCKTOBER 2022

## Health Surveillance Checklist

Health conditions can be exacerbated in the winter months due to colder temperatures, damp conditions and less daylight hours. It is vital that we ensure all BBLP employees are covered by a robust Health Surveillance programme ensuring all of our people are fit for work. The checklist below outlines some key questions to confirm we are taking necessary action to protect our people.

1. Have all new starts completed a health questionnaire?
2. Have all operatives in safety critical roles i.e. highways workers/plant operators/work at height etc. completed a Fit For Role medical?
3. If anyone uses hand held vibrating tools has a HAVS questionnaire been completed?
4. Have all operatives employed for 3 years had a Periodic Health Surveillance/Assessment?
5. Have health risks such as noise, dust, vibration or manual handling been covered in the Daily Activity Briefing?
