Description of Blue Star Item	<p>Solar LED Flashing lights on the GS6 goal posts for Night– time working.</p> <p>The LED lights are solar charged and are low voltage which need no maintenance and have been working and still working from the date installed on the 01/05/16.</p>
Benefits of Blue Star Item	<p>Whilst working on days the GS6 goal posts are clearly visible and you can see the height restriction for the Overhead Cables and structures.</p> <p>But on Nights this is not the case and it is really hard to see the height restriction between the goal posts so I tried to come up with an idea on how to make them more visible by putting LED Flashing lights across the GS6 goal posts to make them more visible at night witch make the height restriction clearly visible.</p>
Details and Cost of any Specific Product	White LEDs about £10 Red £18 and Blue £8.50
