<b>Description of Blue Star Item</b>	<p>This blue star was awarded for our proactive approach to plant people interface. The following collective measures to improve PPI on the project were recognised including:</p> <ul style="list-style-type: none"> <li>• The high standard of our PPI training conducted by the works manager was recognised.</li> <li>• The simple use of a bell push button for the ganger to communicate with the plant operator and stop works to allow him to approach the machine was witnessed.</li> <li>• The dumper permit we have implemented was discussed and the rigorous controls to prevent PPI in respect to dumpers.</li> <li>• The project light vehicle reversing procedure and controls to ensure people are checking behind and the way we are relaying these controls to the workforce using a short video clip.</li> </ul>
<b>Benefits of Blue Star Item</b>	<p>The project has placed this fatal risk high on our agenda. The tireless effort by the fatal risk working group in respect to PPI has resulted in us putting in controls to in many cases eliminate plant people interface.</p>
<b>Details and Cost of any Specific Product</b>	<p>These controls have minimal cost other than the time and effort put into them by staff. Time that is considered very worthwhile</p>
