

An essential piece of your PPE

Make sure you always carry your passport Smartcard!

“The most important safety initiative for us.” Simon Jones, Highways England.

Your HE passport system uses the UK’s most widely used system designed to keep you, your team-mates and projects safe.

What does this mean for me?

Before you start work, the system will be used to check:

- your ID
- your skills and training
- when you last worked to make sure you’ve had enough rest.

What will I need to do?

- You’ll have your own passport Smartcard that you’ll need to bring to work
- Present it at the start of shift to be checked and swiped into your project
- And make sure you swipe your card out when you leave... and that’s it.

Validate, using SkillGuard – the UK’s leading system for mobile workforces. Helping to keep you safe 24/7.
