

Don't Be Left In The Dark

Ensure adequate lighting is available for safe working during the winter

- Site Management must ensure there is adequate lighting in car parks, access routes and common areas (including emergency lighting).
- Contractors must ensure that they have provided appropriate task lighting (must be 110v).
- Avoid creating trip hazards by careful routing of lighting cables.
- Protect lamps from accidental contact / damage.
- Report any poor lighting conditions to site management.
